

XM Radio allows me to keep up with important financial news, weather and traffic as I travel over the South East United States. With normal radio stations the news and info is local and the reception is non existant in some areas of the S.E.XM Radio has allowed me to hear weather, traffic information and breaking national news that could effect everyone during these times any where in the US.

I pay for the service and I made the choice to sign up for XM Radio. No one has the right to take away my choice or rights.

John Erwin
